

FEATURES AND BENEFITS

- ✓ Secure sustainable log resource – not land clearing at environmentally insensitive rates.
- ✓ Large network of production sawmills – not relying on one single sawmill enterprise.
- ✓ All species harvested are typical commercial species used for construction and structural applications – not harvesting species which are generally not considered acceptable for commercial timber applications.
- ✓ Timber grading in accordance with AS 2082 – 2007 Timber – Hardwood – Visually stress-graded for structural purposes.
- ✓ Large stock of timber in “blank” form ready for cog production – supply not effected by disruption to the supply chain (floods etc). Enables some “aging” of timber which aids in mitigating shrinkage issues.
- ✓ Load testing undertaken on actual timber being used.
- ✓ Load frame for on going QA/QC and new product development.
- ✓ Tighter user-friendly interlocking profile – produces quality assembled cogs with minimal supervision.
- ✓ Advanced product development – new products which will potentially enhance safety, productivity and environmental outcomes whilst managing costs.
- ✓ An Australian company which understands Australian hardwood and is focused 100% on timber and its long-term application in underground mines.
